# Physical

## The importance of physical play

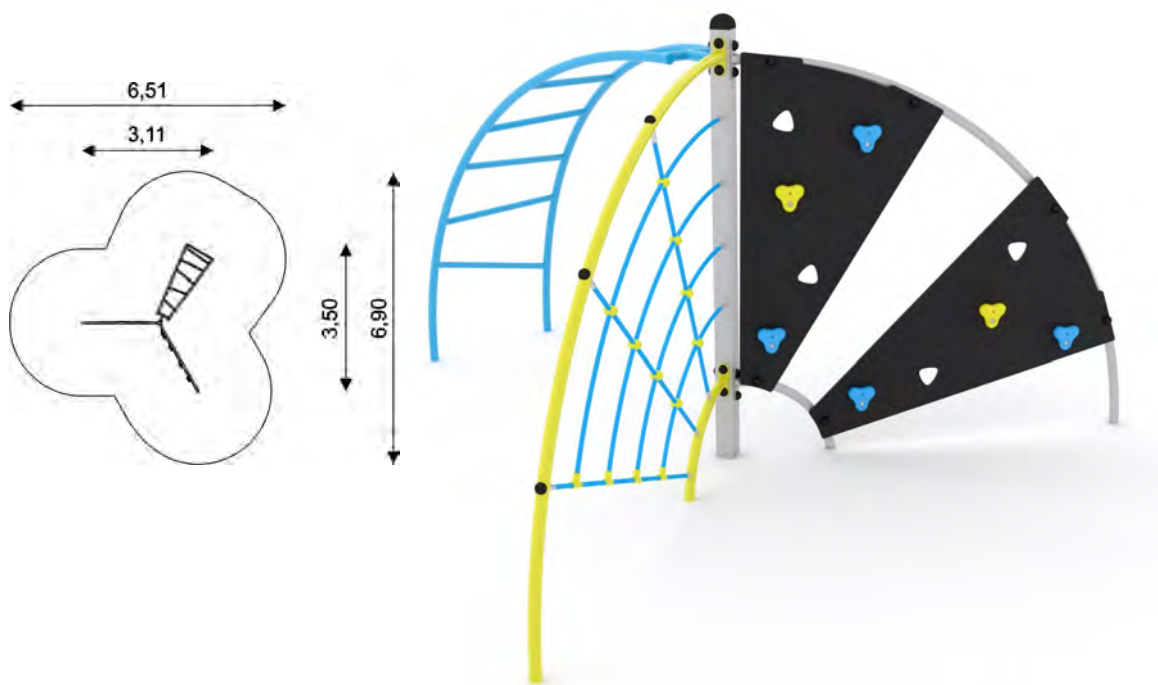

Physical play includes activities that use physical movements to allow children to use their energy, and give children the chance to develop gross and fine motor skills, learn new things and encourage interaction and group play.

Physical play also benefits a child's health. Understanding the importance of physical play is vital to your child's development.

# Cognitive

Cognitive development refers to the way in which a child learns, solves problems, acquires knowledge about the surrounding environment and increases the ability to interact with it

Children acquire different cognitive skills as they meet certain developmental milestones. Our cognitive play equipment range help children improve cognitive development in memory, concentration, attention, perception, imagination and creativity.

# WHAT IS TEQBALL?

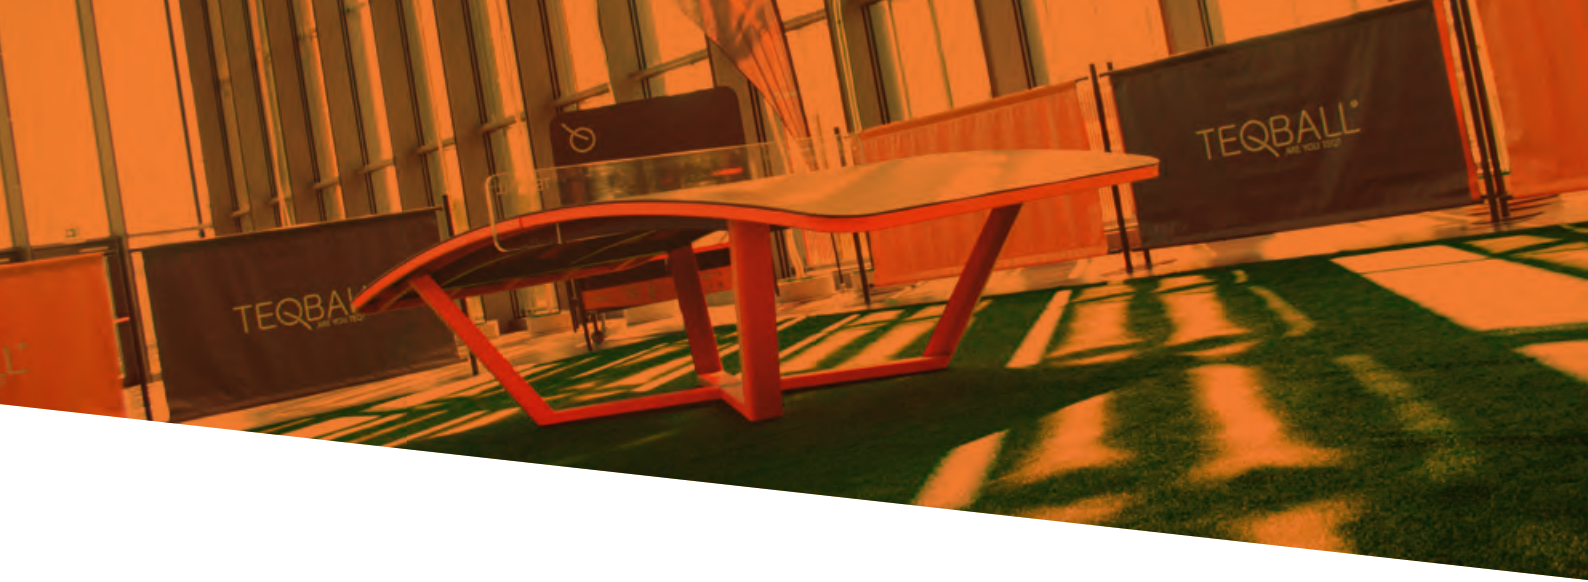

Teqball is a new football-based sport, which is perfectly suitable for professional footballers as well as amateur enthusiasts whose ambition is to develop their technical skills, concentration and stamina. However, it is not only your skills you can improve on this specially-curved board. All you need is an opponent at the other end of the Teqball table and the game can begin! If you can juggle a ball three times, you can excel at teqball as well.

**Teqball is not about luck; the best players always win.**

Teqball is the purest type of football, since there is no physical contact between the players, and therefore injuries resulting from impacts or rough tackling can never take place in the game or during practice. Moreover, the players cannot touch the table either, according to the official rules, which further reduces the risk of injury.

*"Teqball is not football's rival but rather it's complement. Teqball enhances players' confidence, perfects their passing techniques and develops decision making skills, not to mention the so-called 'first touch' moves that are more than essential in modern-day football."*

## Parkour paths

We love this new “Parkour path” which is a sports unit that caters for parkour, street workout and tag all in one unit!!

## Balance parks

Balance is fundamental in all human movement. Research shows that balance skills help children to develop better language, improve reading and writing skills, improve concentration and body control. In practicing new skills in all sports, good balance is a fundamental, strong and is great benefit in fighting sedentary lifestyles.
